Internal Audit

Audit 1

14 October 2024

Document Summary

This Internal Audit aims to verify the proper implementation and monitoring of the Information Security Management System. The audit follows a structured and regulated approach to ensure compliance with relevant rules and regulations, with all documentation completed to meet required standards.

The internal audit for PrimeHealth focuses on ensuring the precise and rigorous application of the Information Security Management System. It evaluates the organization's efforts toward proper implementation and corrective actions. Conducted on 14 October 2024, this audit reviews the organization's scope, information security policies, risk management, objectives, and the metrics needed to effectively maintain the system.

Audit Findings

The Auditor (Milton Baar) highlighted the following issues with PrimeHealth's documentation.
