

RASCI MATRIX

This RASCI Matrix has been developed for PrimeHealth to clearly outline the roles and responsibilities related to key Information Security Management System (ISMS) processes. In line with ISO 27001 standards, this matrix ensures that each security and risk-related process is well-structured, with clear accountability and responsibility assigned to relevant stakeholders.

The RASCI framework organizes key stakeholders into five categories:

- Responsible (R): The individual(s) who are tasked with executing and completing the activity.
- Accountable (A): The individual ultimately answerable for ensuring the process is carried out properly.
- Supportive (S): Roles that provide resources and assistance to complete the task.
- Consulted (C): Individuals or roles whose feedback and opinions are sought before making decisions or actions.
- Informed (I): Roles that are kept informed about progress and decisions.

Process	CEO	CTO	COO	CSO	CFO	CRO	CHRO	CMO
Identifying the ISMS requirements and interested parties	I	C	C	R	S	C	C	C
Defining ISMS basic framework	I	S	C	R	S	C	C	C
Development of the risk assessment and treatment methodology	I	C	C	R	S	C	I	I
Performing the risk assessment and defining the risk treatment plan	I	C	C	R	S	R	I	I
Controls implementation	I	R	S	A	S	S	I	I
Training and awareness of personnel	I	C	C	R	S	C	R	S
Performing the internal audit	I	C	C	C	S	R	I	I
Performing management review	A	S	R	C	S	C	I	I

Addressing nonconformities, corrective actions, and opportunities for improvement	A	S	C	C	S	C	I	S
